

## Virtual Lesson: Seeds On the Move

### Additional Activities

#### Arts and Crafts Activity

Using anything you can find around the house, create a seed that best represents you. You will have to decide how your seed will move.

#### Writing Activity

Using your seed from the Arts and Crafts activity and write a story about how your seed moved to a new place.

#### Helicopter Activity

This will model how seeds move with the wind.

Each person will need a quarter sheet from template provided, scissors and paper clip(s).

You can turn this into a STEM activity by having student make modifications to the helicopter for more distance.

Measurements can be distance traveled or time in the air.
